

The WUS 120T MOST welding trolley is designed for convenient and safe transport of welding equipment together with a technical gas cylinder of appropriate size and weight. The design allows for the placement of equipment without its own wheeled chassis, as well as the transport of additional equipment such as welding torches, TIG wires, tools or spare parts:

- adjustable shelves for welding equipment and coolers (width and height adjustment range 200-300 mm),
- holder and storage compartment for TIG rods,
- hooks for cables and holders,
- fastening straps to secure the welding equipment,
- chain to secure the gas cylinder.

The entire unit is made of powder-coated steel, which ensures durability and resistance to mechanical damage.

The WUS 120T MOST is a practical and versatile solution for welding workshops, guaranteeing mobility, safety and convenience.

Technical data	WUS 120T MOST
Total length	596 mm
Total height	1115 mm
Total width	488 mm
Net weight	26 kg
Max. load capacity	100 kg
Max. gas cylinder size	Ø 230x1240 mm
Catalogue number	50 03 003912
